

Science Backed  
Collagen Formulations

# Collagen White Label

## Premium Private Label Collagen Solutions

CWL helps wellness and personal care brands launch collagen-based products under their own label without the need for in-house formulation or manufacturing.

Our solutions are science-backed, professionally formulated and market-ready, enabling faster launches, lower development risk and scalable growth.

### Why CWL?

#### Expert-driven development

Formulated in collaboration with doctors, scientists and research teams.

#### End-to-end private label support

From R&D and packaging to documentation & go-to-market assistance.

#### Global-ready supply

International shipping and logistics support for domestic and export markets.

# Collagen Vaginal Cream

Collagen Vaginal Cream (CVC) is a non-hormonal, science-led topical cream designed to support vaginal hydration, elasticity and comfort, especially during perimenopause and post-menopause. Formulated with marine collagen peptides, low-molecular-weight hyaluronic acid and barrier-supporting actives, It helps maintain moisture balance and tissue suppleness without hormones, steroids or harsh irritants.

## Product Details

### Functional Positioning:

*Vaginal dryness relief*

*Tissue hydration & elasticity support*

*Comfort during hormonal transitions*

### Target Users:

*Perimenopausal & postmenopausal women*

*Women seeking non-estrogen alternatives*

### OEM / Private Label:

*Tube or airless pump formats (30 g / 50 g / 75 g)*

### Manufacturing & Compliance:

*Cosmetic / intimate-care compliant ingredients*

*Non-hormonal formulation suitable for long-term*

**pH:** *Buffered to vaginal-friendly range*

**Preservative System:** *Sodium benzoate & potassium sorbate with multifunctional humectants*

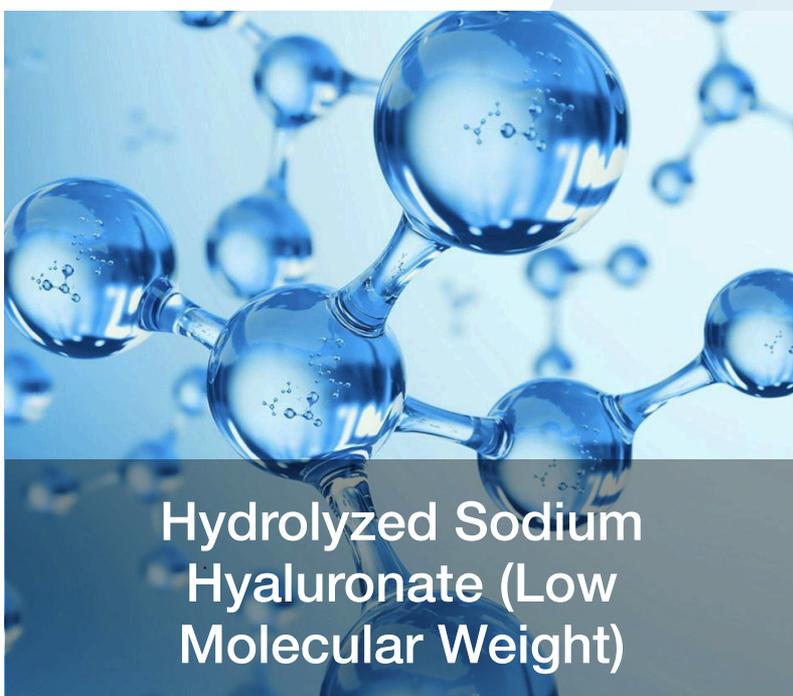

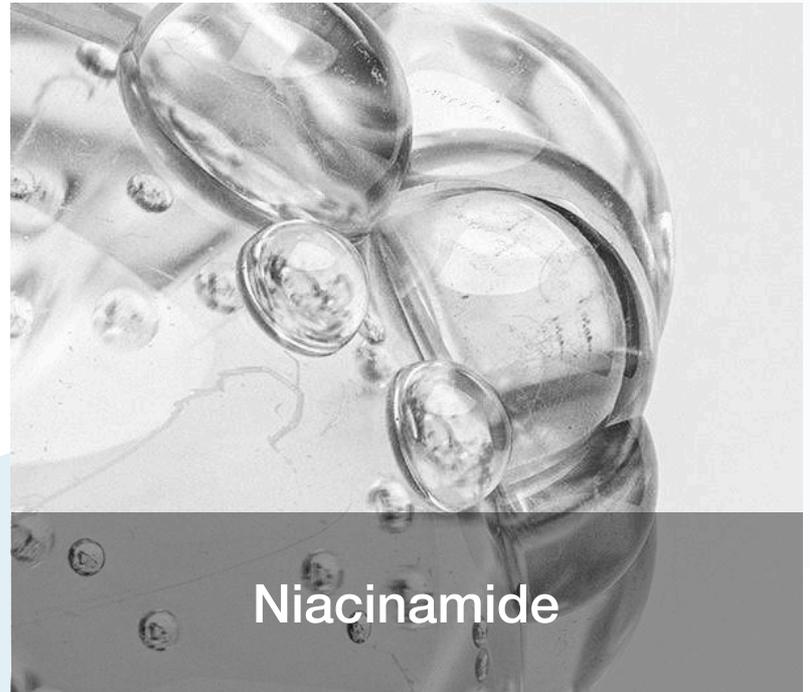

**Allergens:** *Contains soybean extract*

**Free From:** *Hormones, steroids, parabens, mineral oils*

**Texture:** *Soft, non-sticky, fast-absorbing*

# Key Ingredients (Functional Rationale)

# Vegan Collagen Mouthwash

Vegan Collagen Mouthwash (VCM) is an alcohol-free oral rinse developed to support gum health, oral mucosa integrity and daily oral comfort. Instead of collagen peptides, it uses a vegan collagen precursor a targeted blend of amino acids and cofactors designed to support natural collagen synthesis in oral tissues. Combined with clinically used herbal extracts and gentle flavouring agents, VCM offers a restorative, non-irritating alternative to conventional mouthwashes.

## Product Details

**Designed for sensitive mouths and elderly users.**

**Functional positioning:** *Gum support, mucosal comfort, oral barrier care*

**OEM / Private Label:** *Custom flavours & colours, Multiple bottle sizes (100 ml / 250 ml / 500 ml), Custom labels, shrink sleeves & cartons*

**Manufacturing:** *ISO and FSSAI-guided oral-care standards*

**24 months (aqueous system with preservative support)**

# Key Ingredients (Functional Rationale)

Sodium benzoate & potassium sorbate

Menthol crystals (Low Dose)

Xylitol & Glycerine

Food-grade Preservative System

Herbal Extract Blend (Neem, Akarkara, Tumburu, Tulsi)

Vegan Collagen Precursor (Amino Acids + Cofactors)

# Marine Collagen Powder

Marine Collagen Peptides are high-purity, low-molecular-weight collagen peptides derived from sustainably sourced fish skin and scales. Designed for fast absorption and high bioavailability, this unflavoured powder supports collagen-dependent tissues including skin, joints, cartilage and connective tissue.

## Typical Applications:

Beauty & skin supplements

Joint & bone support

Sports recovery & active ageing

Powders, sachets, sticks, beverages, gummies

## OEM / Private Label:

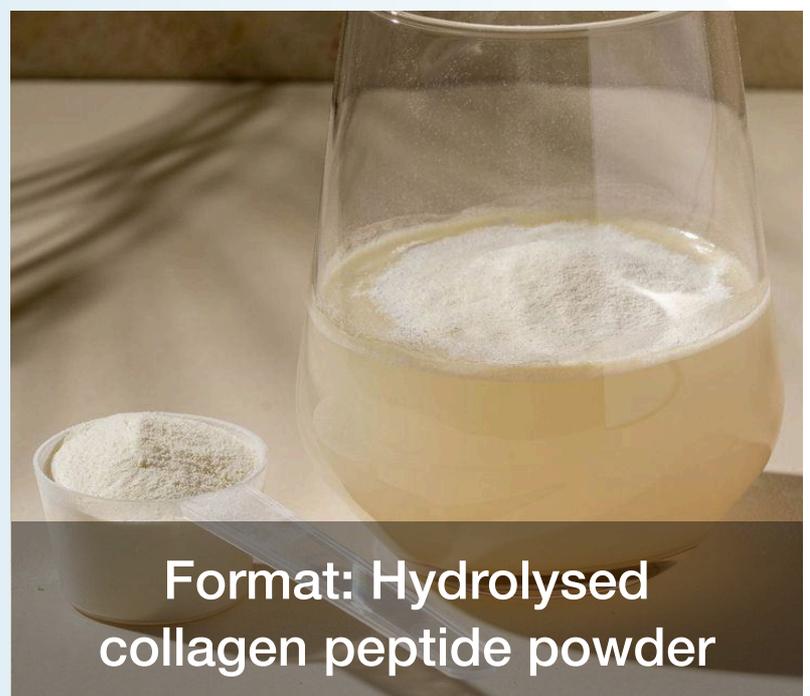

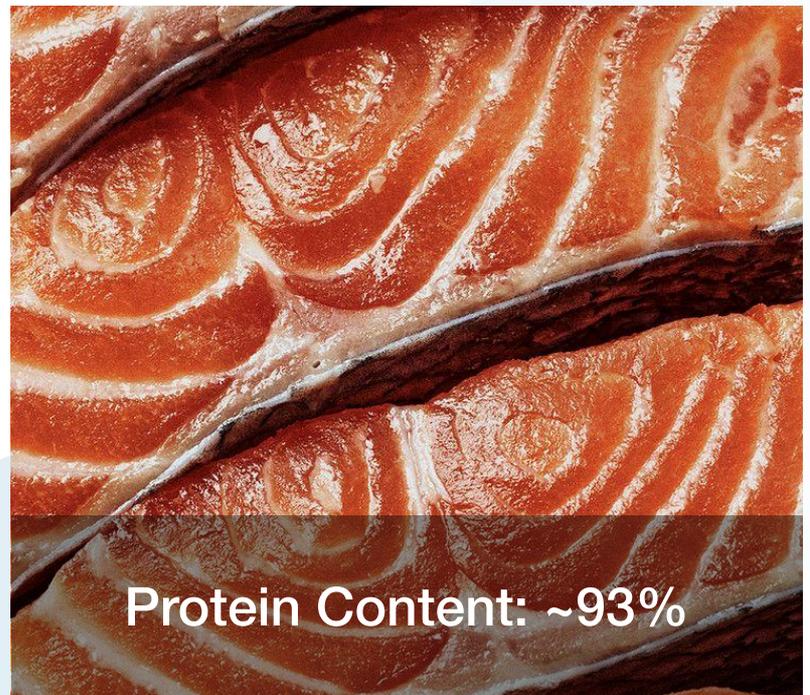

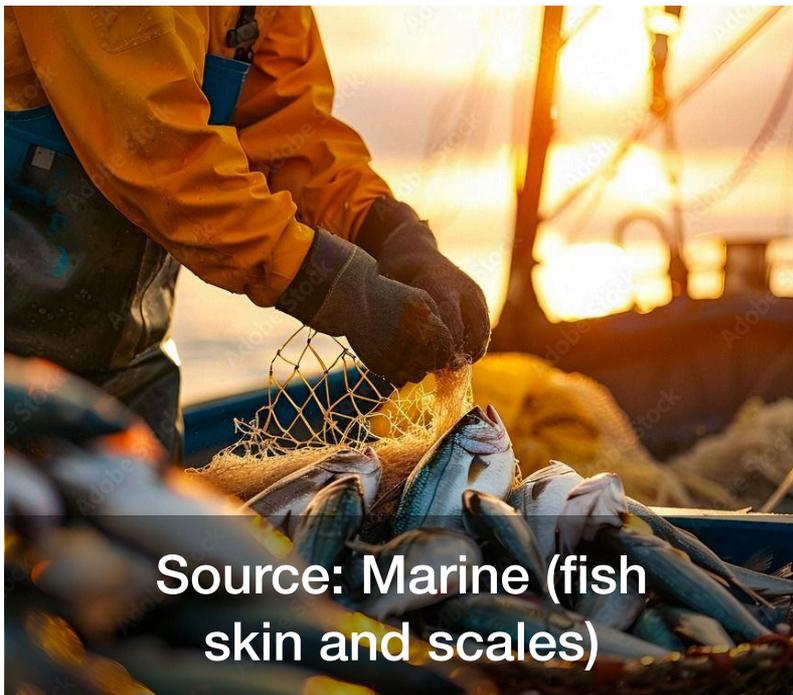

Bulk supply or finished product formats

Compatible with flavouring, vitamins, minerals & botanicals

ISO certified/FSSAI compliant/  
Export-grade specifications

# Key Ingredients (Functional Rationale)

# Vegan Collagen Precursor

Vegan Collagen Precursor is an advanced, 100% animal-free solution that supports the body's natural collagen production by delivering essential amino acids and cofactors instead of collagen peptides. Formulated with fermented low-molecular-weight amino acids, Vitamin C, and plant-based actives, it offers a clean-label, easily absorbable option for next-generation beauty, joint, and wellness formulations.

## Product Details

**Format:** Collagen precursor powder  
(amino acids + cofactors)

**Source:** Microbial fermentation + plant extracts

**Taste & Colour:** Neutral

**Absorption:** Low-molecular-weight components (<300 Da)

**Typical Applications:**

Vegan beauty & skin supplements

Joint & connective tissue support

Active ageing & daily wellness

Powders, sachets, sticks, RTDs, gummies

**OEM:** Ingredient/ finished product formats,

Easy blending with vitamins, minerals & botanicals

## Quality & Safety Snapshot

**Heavy Metals:** Within global food-grade limits (Pb, As, Cd, Hg – BLQ)

**Microbiological Standards:** TPC ≤ 500 CFU/g, *E. coli*,

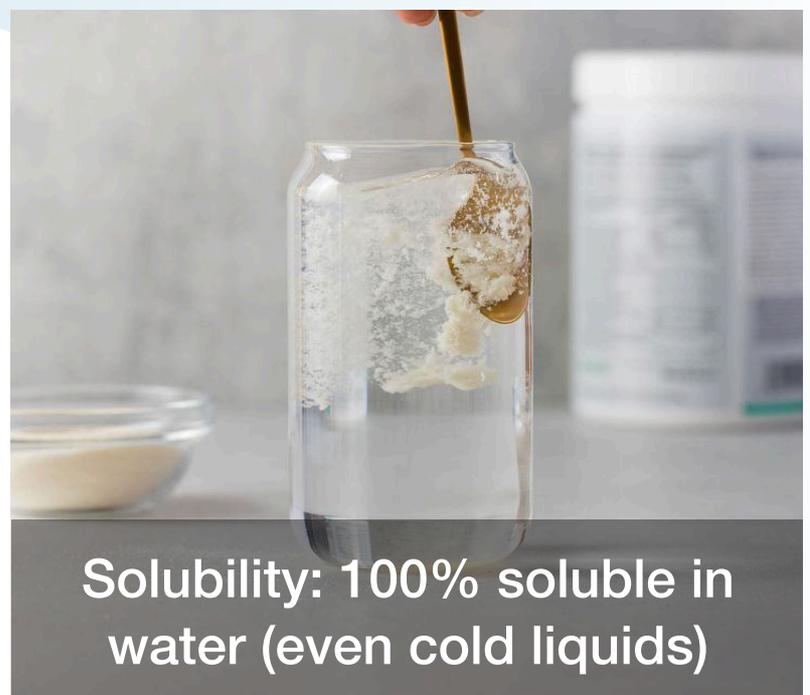

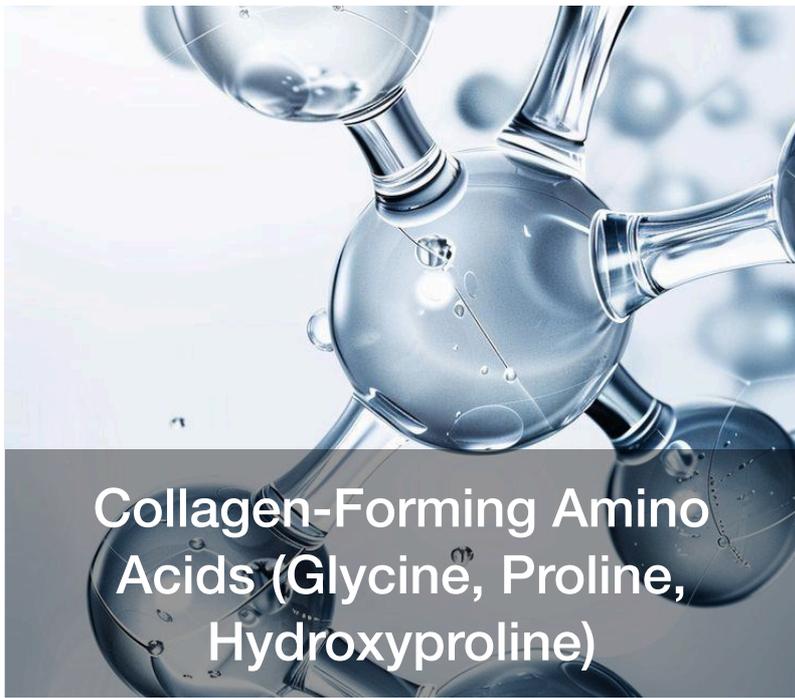

**Staphylococcus aureus:** Absent

**Allergen-Free:** No milk, soy, gluten or egg

**Claims-Friendly:** Non-GMO, source of Vitamin C
